

Situation Document

Problem Identification

Poverty levels remain high in certain states (e.g., Chhattisgarh 39.93%). Current reporting fragmented, no unified analysis system.

Current State

Data sources: Census, Govt Schemes, Employment, Household Expenditure. Analysis manual, scattered across departments. No consolidated poverty % dashboard.

Future State

Centralized Poverty Analysis System. Automated data ingestion + unified reporting. Outputs: Poverty % Report, RCA Findings, Policy Recommendations.

Gap Statement

Current → fragmented, manual, inconsistent. Future → integrated, automated, actionable insights. Gap → Need for system to unify inputs and produce reliable outputs.
