A stacked bar chart comparing three metrics across three ship modes: Standard Class, Second Class, and First Class. The metrics are Product ID Count (blue), Cost Average (orange), and Avg_ShipDelay (red). The left y-axis represents Product ID Count (0 to 500), and the right y-axis represents the other two metrics (0.000% to 0.010%). An orange line connects the top of the bars, representing the total value for each ship mode.

Ship Mode	Product ID Count	Cost Average	Avg_ShipDelay
Standard Class	299	144.07	0.0124%
Second Class	95	143.58	0.0082%
First Class	184.12	0.0055%	0.010%

The chart displays two data series over a time period from 0 to 2000. The y-axis ranges from 2K to 3K. The 'Orders Count' series (blue line) and the 'Average of ShipDelay' series (brown line) both show a sharp increase towards the end of the period, with 'Orders Count' reaching approximately 3.1K and 'Average of ShipDelay' reaching approximately 2.4K.

Time	Orders Count	Average of ShipDelay
2000	~2.1K	~2.1K
2001	~2.2K	~2.2K
2002	~2.3K	~2.3K
2003	~2.4K	~2.4K
2004	~2.5K	~2.5K
2005	~2.6K	~2.6K
2006	~2.7K	~2.7K
2007	~2.8K	~2.8K
2008	~2.9K	~2.9K
2009	~3.0K	~3.0K
2010	~3.1K	~3.1K

P&L Status by Region

A bar chart titled 'P&L Status by Region'. The y-axis is labeled 'Sales/Profit_Ratio' and ranges from 0% to -200% with major grid lines at 0%, -100%, and -200%. There is a single bar for the 'Central Region' which is orange and extends to -155.07%.

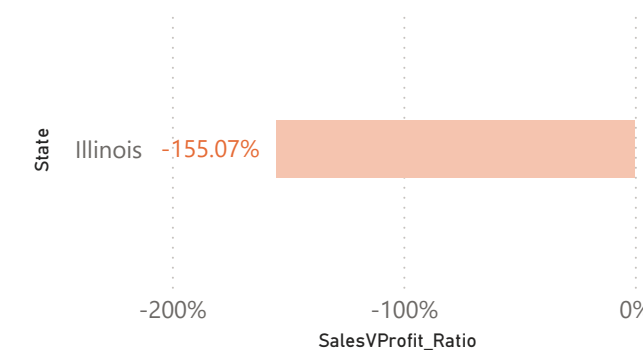

Region	Sales/Profit_Ratio
Central Region	-155.07%

P&L Status by State

A horizontal bar chart titled "P&L Status by State". The y-axis is labeled "State" and the x-axis is labeled "SalesVProfit_Ratio". The x-axis has major ticks at -200%, -100%, and 0%. A single orange bar represents the state of Illinois, with a value of -155.07% labeled next to it.

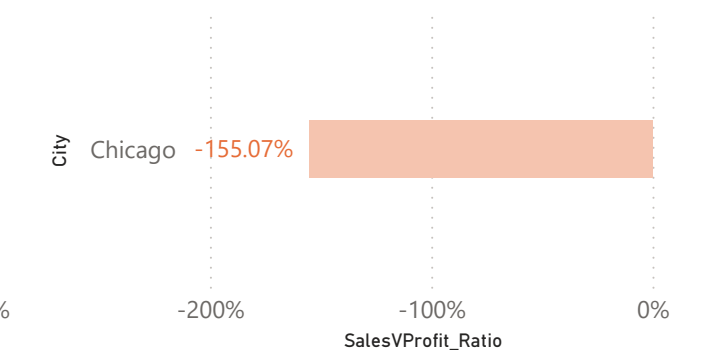

State	SalesVProfit_Ratio
Illinois	-155.07%

P&L Status by City

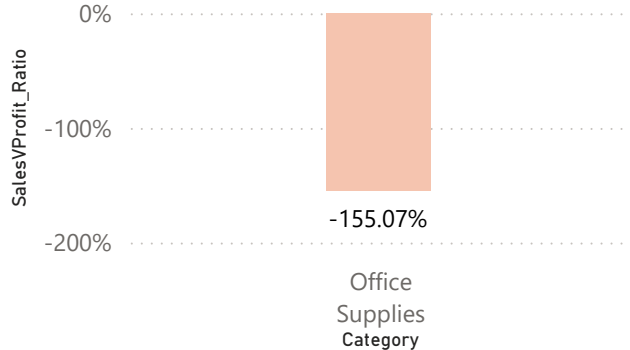

A horizontal bar chart titled 'P&L Status by City'. The x-axis is labeled 'SalesVProfit_Ratio' and ranges from -200% to 0% with major grid lines every 100% and minor grid lines every 10%. The y-axis is labeled 'City'. There is one data point for 'Chicago' with a value of -155.07%, represented by an orange bar.

The figure consists of two bar charts, one above the other, both titled "Hypothesis Testing - Sentimental Analysis - S&P value impact by Month wise". Both charts share a y-axis labeled "Sales/Profit_R..." ranging from 0% to -4000% in increments of 2000%. The top chart displays 12 bars, all of which are very close to 0%. The bottom chart displays 12 bars, also mostly close to 0%, but with one bar in the 5th month (from the start of the bottom chart) showing a significant negative value of approximately -3500%.
